DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

With respect to Claims 1 and 25, the prior art made of record fails to teach a polymer matrix film comprising carbon nanotubes or nanofibers which extend in a direction parallel to a thickness direction of the film and form conductive channels which extend perpendicular to the thickness direction of the film, wherein a first and second electrode electrically contact the conductive channels at each end, respectively.

With respect to Claim 26, the prior art made of record fails to teach the nanosensor, wherein the at least one conductive channel comprises carbon nanotubes or nanofibers extending lengthwise through the polymer matrix such that opposing ends of the nanotubes or nanofibers are exposed in opposing faces of the matrix.

With respect to Claim 29, the prior art made of record fails to teach the method of determining a physical condition of a material using a nanosensor as claimed, wherein the method further includes the steps of incrementing a point in a relevant stress, strain, thermal, DC and AC position, as a reference data-point is compared against it, and placing the data into a grid patten for mathematical analysis and go/ no go options.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
